

There is a *Better Way* to Store and Retrieve Documents

If you find yourself spending more time and money searching, filing, and storing documents – you need Chameleon Document Imaging.

Construction Imaging Systems

The #1 provider of document imaging and workflow for the construction industry.

Document Imaging and workflow for:

- Accounts Payable
- Job Documents
- Property Management
- And More

Chameleon

Chameleon Document Imaging is designed for the smaller construction company, offering a document management solution that only the larger, more sophisticated construction firms could afford to implement in the past. Companies of all sizes recognize the benefits of a "paperless" solution.

Using document imaging technology we can show you how to eliminate *storage cost* and reduce *time and labor* researching filed documents as your business continues to grow.

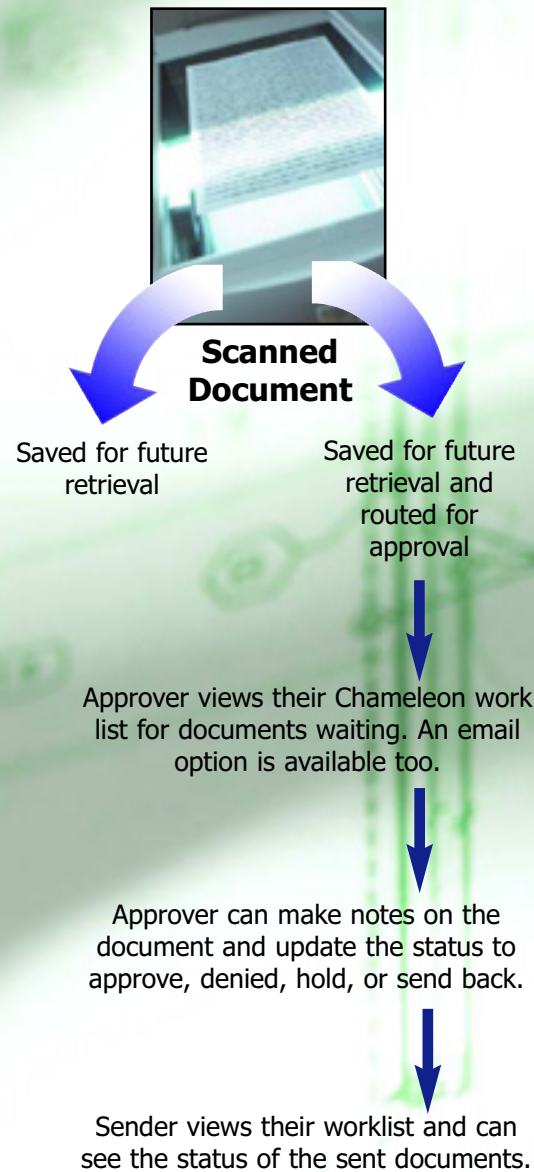

Documents are stored electronically and can easily be backed-up *providing protection* against catastrophes.

Construction Imaging Systems, a company with over 10 years experience, is a national provider of document imaging for construction, home building, and property management companies. Our software solutions integrate with most accounting packages.

Improve Your Workflow with Document Imaging.

Scanned document images can be electronically sent to managers for approval or follow-up eliminating the need to hand-carry original documents. This results in faster processing and eliminates lost paperwork.

Chameleon was designed exclusively for the construction industry to organize documents and provide fast and easy retrieval.

Chameleon uses electronic cabinets to separate images by document type. The four standard cabinets include accounts payable, job documents, human resources, and property management. Each cabinet has a standard set of indexes to file each image. Additional cabinets and/or indexes can be added as needed.

| Accounts Payable | Job Documents | Human Resources | Property Management |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Indexes to file by include: <ul style="list-style-type: none"> • Vendor Name/Number • Invoice Number • Invoice Amount • And More Additional Indexes can be added as needed. | Indexes to file by include: <ul style="list-style-type: none"> • Job Number • Document Type • Date • And More Additional Indexes can be added as needed. | Indexes to file by include: <ul style="list-style-type: none"> • Employee • SSN • First and Last Name • And More Additional Indexes can be added as needed. | Indexes to file by include: <ul style="list-style-type: none"> • Property • Unit • Tenant • And More Additional Indexes can be added as needed. |
